## Water Saving “Fish Tail” laterals

Exotuf Filters are equipped with “Fish Tail” laterals, to improve its filtration and backwashing hydraulic efficiency.

Fish Tail laterals provide effective coverage of the filter bed and balanced water flow, during backwashing.

Exotuf Filters backwash time is significantly reduced, leading to a 30% savings of backwash water.

Conventional filter lateral system

## Energy Saving “Fish Tail” laterals

The Exotuf Filters hydraulic efficiency halves the backwash flow rate of a conventional sand filter, allowing the option for low powered, energy efficient pumps for filtration flow and backwash flow.

## Enhanced Water Clarity

Lowering a filter’s flow rate not only significantly decreases the pump’s energy requirements, but also reduces water flow resistance in your pool equipment and plumbing.

A lower flow rate also has the added benefit of enhancing your pool’s filtration efficiency, greatly enhancing the clarity of your swimming pool water.
